Triumph AFL Footy Tipping Competition Rules of Play in 2025

There is one opening round and twenty-four rounds, each round consisting of up to nine AFL games to tip against. Participants predict the result of each game by nominating the correct result. Participants must also select the margin they think will be scored in the margin game played in each round.

Awarded Points:

1	Point	A correct prediction will be awarded one point per game.

Bonus Points

1	Point	Participant(s) who pick the correct prediction and closest margin of the nominated game of the round will be awarded one bonus point per round.
1	Point	A correct prediction of an interstate team winner where the home team is playing in their home state will be awarded one bonus point per game.
2	Points	A correct prediction of the lowest bottom ten team beating any top eight team will be awarded two bonus points per round.
10	Points	A correct prediction of a drawn game will be awarded ten bonus points per game.
2	Points	Participant(s) predicting all correct results in a round will be awarded two bonus points per round

For details on definitions and the resolution of a drawn round, please refer to points 1, 21, 22, 23 in the Terms & Conditions.

Special Note:

- In 2025 all players will be given the concession to have "three rounds of Tips" submitted by the Triumph Team on their behalf, if they fail to lodge them by the cut off time, which is before the bounce down of the first game of each round.
- After the three concession games have expired and no entry is received by the cut-off time, no tips will be recorded by Triumph and the Participant will be ineligible for bonus points and prizes for that round but will still be eligible for the overall prize. Tips entered before the cut-off time may be modified provided the changes are completed prior to the cut-off time.
- All concession games will be allocated away games including bonus points excluding the margin bonus point.

Triumph is a home-grown success story.

Triumph Business Systems Pty Ltd are the owners and developers of Triumph ERP Software, and are an Australian software development company offering the latest in technological and software design. Triumph ERP Software is 100% Australian owned and developed from the ground up and has built on its success for more than 30 years.
